

Indian PET Plastic Credit Framework- Companies Guide

An Initiative by IIT Delhi, Waste 2 Wealth Team

Company User Guide

For companies entering PCC and PPC credit data

1. Register your account

Go to pet-credit-portal.onrender.com → click **Register** → enter your company name, email, and password (min. 6 characters) → you will receive a 6-digit OTP on your email → enter the OTP to activate your account.

2. Log in

Enter your email and password → an OTP is sent to your email → enter the OTP to access your dashboard. OTPs are valid for 10 minutes.

3. Add Collection Credits (PCC)

Click **Collection Credits (PCC)** tab → under Ledger Date select the Year, Month, and Day of the collection event (no future dates allowed) → select Collection Category → enter Weight in tonnes → enter ESG Score (0–100) → click **+ Add Entry**. The PCC credit is calculated automatically.

4. Add Processing Credits (PPC)

Click **Processing Credits (PPC)** tab → select the Ledger Date → select the Product Type → enter Weight in tonnes → enter ESG Score → click **+ Add Entry**. The W factor and PPC credit are calculated automatically based on the product's service life and exposure factor.

5. Understanding ESG tiers **important**

Score above 80 = Tier I ($\times 1.10$) · Score 65–80 = Tier II ($\times 1.05$) · Score 50–65 = Tier III ($\times 1.00$) · Score below 50 = Ineligible (no credits). The ESG bar shows your tier in real time as you type.

6. Edit or delete entries

In the Entries table, click any weight or ESG score cell to edit it directly — changes save automatically. Click the ✕ button at the end of a row to delete that entry permanently.

7. View Annual Summary

Click **Annual Summary** to see total PCC, PPC, combined credits, and total weight across all months in a chart and table.

8. View CO₂ Savings

Click **CO₂ Savings** to see estimated CO₂ saved from your collection and processing activities, broken down by entry with subtotals and a grand total.

9. Export your report

Scroll to the bottom of the dashboard → click **Export Full Report (PDF)** for a printable report or **Export Full Report (Excel)** for a CSV file containing all PCC, PPC, and CO₂ data.

10. Forgot password

On the login page click **Forgot password?** → enter your registered email → enter the OTP sent to your email → set a new password.

Important: Entry Date is the actual date the collection/processing event occurred. Record Date is automatically set to today's date when you submit the entry. Both are shown in the entries table and cannot be edited after submission.
